Art Unit: 2154

DETAILED ACTION

1. Claims 1-24 are presented for examination. Claims 13-24 are examined. Claims 1-12 are restricted.

2. Applicant's arguments, filed on 02/21/2006, with respect to final rejection have been fully considered and are persuasive. The finality of the previous Office action has been withdrawn.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a method of obtaining selected content for a web page, wherein the selected content itself is not initially part of the web page, the web page including script associated with the selected content, classified in class 709, subclass 203.
 - II. Claims 13-24, drawn to a method of syndicating digital assets, classified in class 715, subclass 731.

Art Unit: 2154

4. The inventions are distinct, each from the other because of the following reasons:

- 5. Inventions I II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as lacking a method of syndicating digital assets, particulars. See MPEP § 806.05(d).
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and the search required for one group is not required for another group, restriction for examination purposes as indicated is proper.
- 8. During a telephone conversation with Clark A. Jablon on 07/27/2006 a provisional election was made without traverse to prosecute the invention of group II, claims 13-24. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-12 are withdrawn from

Art Unit: 2154

further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

- 9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Claim Rejections - 35 USC § 101

11. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

12. Claims 13, 17 and 21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 13, 17

Art Unit: 2154

and 21 are non statutory, directed to software, per se, lacking storage on a medium which enables any underlying functionality to occur.

Claim Rejections - 35 USC § 112

- 13. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 14. Claim 21 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: means does not correspond to well-defined structure of a computer or computer component implemented in either hardware or software and its associated hardware platform.

Claim Rejections - 35 USC § 102

15. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 09/923,923

Art Unit: 2154

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Page 6

- 16. Claims 13-24 are rejected under 35 U.S.C. 102(e) as being unpatentable as being anticipated by Pettersen et al (US 6,826, 594) (hereinafter Pettersen).
- 17. As per claim 13, Pettersen teaches a method of syndicating digital assets comprising:
- (a) constructing a web page (fig 2); and
- (b) inserting into the web page script associated with at least one digital asset (fig 2, col 4, lines 11-28) that is desired to be part of a fully rendered web page (fig 2), wherein the script, when executed by a browser, requests the content of the digital asset from a remote site (fig 2, col 8, lines 6-30, the request including a uniform resource identifier (URI) of a web page and a unique identifier of the selected content (fig 2, col 8, lines 6-30).
- 18. As per claim 14, Pettersen teaches the script is JavaScript (fig 2, col 8, lines 6-30).
- 19. As per claim 15, Pettersen teaches a method of claim 13 wherein the selected content is an executable file (98, fig 2).

Art Unit: 2154

20. As per claim 16, Pettersen teaches a method of claim 13 wherein the script includes a subscriber identifier and a content identifier, which together, create the unique identifier of the selected content (col 27, line 15).

- 21. Claims 17 and 21 do not teach or define any new limitations above claim 13 and therefore are rejected for similar reasons.
- 22. Claims 18 and 22 do not teach or define any new limitations above claim 12 and therefore are rejected for similar reasons.
- 23. Claims 19 and 23 do not teach or define any new limitations above claim 15 and therefore are rejected for similar reasons.
- 24. Claims 20 and 24 do not teach or define any new limitations above claim 16 and therefore are rejected for similar reasons.

Conclusion

25. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Art Unit: 2154

U.S. Patent 5,987,525

U.S. Patent 6,484,149

U.S. Patent 6,493,733

U.S. Patent 7,013,340

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad A. Siddiqi whose telephone number is (571) 272-3976. The examiner can normally be reached on Monday -Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Follansbee can be reached on (571) 272-3964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 09/923,923
